

Get Vertical

THE HELIUM is designed for active people for use indoors and outside. Constructed of high-strength aircraft aluminum and titanium, the Helium is the lightest weight stand-up wheelchair in the world. Brilliantly engineered, this ergonomically-friendly standing system incorporates gas struts that deliver the safe and easy lift you need.

A patented back angle compensation system and adjustable seat depth allow a perfect fit tailored to you. Sturdy and comfortable neoprene-foam knee blocks and an adjustable chest belt ensure the standing position is comfortable and secure.

The Helium increases independence and puts you eye-to-eye with family and friends. And it may provide a myriad of health benefits, including: better muscle tone and strengthened bones, improved circulation and digestion as well as reduced spasticity.

HELIUM

GET VERTICAL – Glide your way smoothly and easily to the standing position in a high-performance, light-weight wheelchair with clean lines and great looks to match.
